Product Structure

Package Contains

1 x Device

1 x USB Cable

1 x Mask-fixed Ring

1 x User Manual

Product Specifications

Model No: KFB286

Power Supply: DC 5V, 1A

Waterproof Level: IPX7

Voltage: 3.7V

Product Power: 2.02W

Battery Capacity: 700mAh

Charging Time: 2-3 hours

Single Working Time: 4 minutes

Function

Vibrations: High frequency vibrations to effectively clean, purify facial skin, removing dirt and impurities.

3D Rotary Magnetic Technology: Utilises three 3D Rotary magnetic beads to deeply cleanse the skin and enhance the skin elasticity.

Positive Ion: Extracts dirt from pores and removes makeup residue, leaving the skin purified.

Negative Ion: Delivers nutrients deep into the skin, improving absorption.

Red Led Light Therapy: Stimulate skin cells to produce collagen to firming and smoothening skin texture.

Blue Led Light Therapy-465nm: Kills bacteria and supports cell regeneration, repair inflammation and acne prone or aging skin, brightens skin tone, and improves elasticity.

EMS (Electrical Muscle Stimulation): Activates skin cells, stimulates collagen rejuvenation, improves elasticity, softens wrinkles, and leaves skin smooth and healthy.

Heating Massage: Helps open pores for deep cleansing and improves the absorption of skincare products.

Mode Introduction

1. Cleaning Mode

3D Rotary Magnetic Technology will deeply clean the skin and improve the skin elasticity.

2. Soothing Mode

Blue Led Therapy kills the bacteria and EMS stimulates the collagen to firm and smooth texture.

3. Skin Rejuvenation Mode

Red led Therapy Regenerates skin cells, negative ion improve essences absorption, and EMS also works in this mode.

How To Use

11. WEEE disposal information.

Troubleshooting

This chapter summarises the most common problems you could encounter with the device. If you are unable to solve the problem with the information below, please contact your local dealer or distributor for assistance.

Problem	Solution
The device doesn't charge	Make sure the device or USB connected to USB port of power supply is live. Check whether the voltage indicated on the device corresponds to the local main voltage. Check whether contact pins on the device are in proper contact with the contact points. When the charging light on the device still does not light up or when the device doesn't charge, please take it to your local dealer or distributor for assistance.
The device does not work anymore	Make sure that you have pressed the power button properly. Charge the device according to the instructions in this user manual. Verify whether there is a power failure if the USB port is live. Check if the charging light on the device lights up to make sure the device is charging. If it does not light up or if the device still does not work, please take it your local dealer or distributor for assistance.
The device is suitable for use on my skin or not.	Do not use the device on wet, chapped skin, open wounds or when you suffer from eye diseases, eye irritation, eye infection etc. If you had any surgery on your face/eyes, please consult your physician before using the device. It is advised to remove contact lenses before using the device.
Skin and eye is reacting to the treatment (burning feeling/itchiness)	This treatment may lead to mild redness directly after the treatment, because the blood flow will be influenced. These effects usually disappear within several minutes.
